## Game Components

12 Train Station cards

All Expansion 2 cards are marked with a '2' in the upper right corner. This expansion is compatible with both the Base Game and the Companions expansion.

1 double sided Train Station map and Special Delivery Events List

1 Wooden train

4 double sided Special Delivery Events tiles

## Setup

Place the Train Station map next to your Search Tableau. Shuffle the 12 Train Station cards and deal them face down into 3 piles of 4 cards. Place one pile beneath each of the marked (A) (B) (C) positions at the bottom of the Train Station map. Flip the top card of each pile face up.

## Play

### Phase 1A:

When the first Cities card is placed in the Journey Row, put the train on that city on the Train Station map. As new Cities cards appear in the Journey Row, you may move the train without cost to that new city if it is one stop adjacent to the train's current city position. If the city is more than one stop away, pay 1BP per intermediate city stop until you arrive at your chosen destination.

**Example: Monte Carlo to Rome - 0BP**

**Monte Carlo through Rome to Budapest - 1BP**

**Monte Carlo through Nice through St. Moritz to Prague - 2BP**

When the train arrives in a city, choose the corresponding (A), (B) or (C) pile.

Each city gives you a choice between two of the three piles. If a pile is exhausted, you cannot draw from that pile. Once you have chosen a card, you may do the indicated action at any time prior to the train moving to a new city.
